REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant application is directed towards an unobvious improvement in the turbine blade cooling art. Specifically, the invention calls for a coolant inlet commencing in the aft face of the dovetail of the turbine blade.

Prior art references such as US Patent 6,491,496 to Starkweather and US Patent 5,320,485 to Bourguignon et al. disclose similar cooled turbine blades that have radial coolant inlets, which are also claimed in the instant application. Further, prior art reference 5,320,485 to Leone et al. teaches having an axial coolant inlet on the aft face of the dovetail. While all of the references disclosed are of a related art, none of the references provide motivation to combine the aft inlet of Leone et al. with the cooling circuits of Starkweather or Bourguignon et al. as claimed by Applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
